About the Portfolio Manager

FG Asset Management (FGAM) is a Multi-Manager specializing in the design, construction and management of investment solutions for clients of FG Investment Partners. The FGAM Investment Committee consists of 6 investment professionals with extensive experience in investment markets. The FGAM investment process of manager selection and monitoring is driven by the Investment Committee which includes 2 full-time analysts supported by independent economic, sector and stock market experts.

Fund Objective and Investment Policy

The objective of the fund is to provide investors with long term capital growth with a high-risk profile. Income will be of secondary importance. Investments to be included in this fund will, apart from assets in liquid form, consist solely of foreign collective investment scheme. This global fund has flexibility to invest in a wide spectrum of collective investment schemes in equity, non-equity, bond, money market and property markets. The flexibility is therefore between countries, regions and asset classes. The asset allocation in the fund will be actively managed, and the assets will be shifted between the markets and asset classes to reflect changing economic and market conditions. The exposure to global market will be at least 80% of the assets.

Risk Return Profile

Aggressive

You can afford to take on a higher level of risk (ie, will have a greater exposure to equities in your portfolio) because of your investment time horizon or your appetite for risk. You know that in taking the risk, you need to be patient if you want to achieve the results, thus you are willing to invest for the long-term and are prepared to tolerate some volatility in the short term, in anticipation of the higher returns you expect to receive in five years or beyond.

Risk Disclosures

The portfolio may include foreign investments and the following additional risks may apply: liquidity constraints when selling foreign investments and risk of non-settlement of trades; macroeconomic and political risks associated with the country in which the investment is made; risk of loss on foreign exchange transactions and investment valuation due to fluctuating exchange rates; risk of foreign tax being applicable; potential limitations on availability of market information which could affect the valuation and liquidity of an investment. All of these risks could affect the valuation of an investment in the fund.

Mandatory Disclosures

All reasonable steps have been taken to ensure the information on this MDD is accurate. Collective Investment Schemes are generally medium to long term investments. The value of participatory interests or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-dividend date. Forward pricing is used. A schedule of fees and charges and maximum commissions is available on request from the manager. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. Fund of funds invest in portfolios of other Collective Investment Schemes that levy their own charges, which could result in a higher fee structure for the fund of funds. The individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Sanlam Collective Investments (RF) (Pty) Ltd retains full legal responsibility for the Co-Naming portfolio. Transaction cutoff time is 15:00 daily. Each portfolio may be closed for new investments.
